

## Decision Group Basic Tactic LI Package Contains

**1** 3 sets of E-Detective Systems for interception on both HTTPS and non-HTTPS traffic, data reconstruction, data correlation if provision data available

1 set of Data Retention Management System for data retention and analysis **2**

**3** 1 set of Traffic Load Balancer for traffic load control and high availability mechanism

1 set of VPN Router for security control on data access and transmission **4**

**5** 1 set of 24-port Switch

22U rack with rollers **6**

### Options

- 1 set of KVM and Monitor for local management
- 1 set of UPS for power management
- Brace frame for cable management
- Ventilation facility
- Tracking Sensor (GPS or NFC)

### Training Programs

- NPFAT – Network Packet Forensic Analysis Training / 3~5 days
- LI Training – Introduction to Lawful Interception / 3 days

Online Demo and Reference upon Available by Request

# Tactic Lawful Interception System Package

For Cyber Investigation, Lab and Training of Law Enforcement Agency

### Advantages

- This package provides edge cutting functions of data access, data delivery, content reconstruction, and data analysis within one box for cyber investigation.
- It can be used for different telecom packet data networks of fixed network, IMS, WiMax, UMTS, and eUTRAN by lower total cost of ownership.
- It can perform the interception operation on both non-HTTPS and HTTPS traffic, especially on those popular mobile services.
- It can be integrated by LEA requirement with different applications of SIEM, Link Analysis, Text Mining...etc., and upgraded into regular ETSI-compliance LI platform.
- Remote Operation and Management with high level security mechanism and activity log for auditing.

Address: 4/F No. 31, Alley 4, Lane 36, Sec.5, Ming-Shan East Road Taipei, Taiwan.

## Planned Deployment

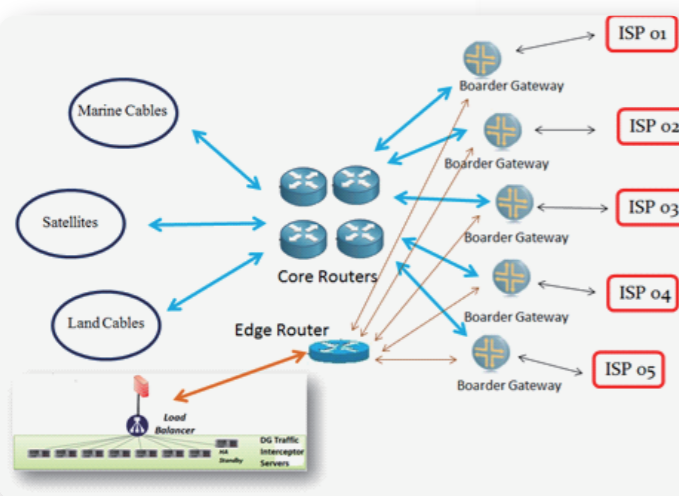

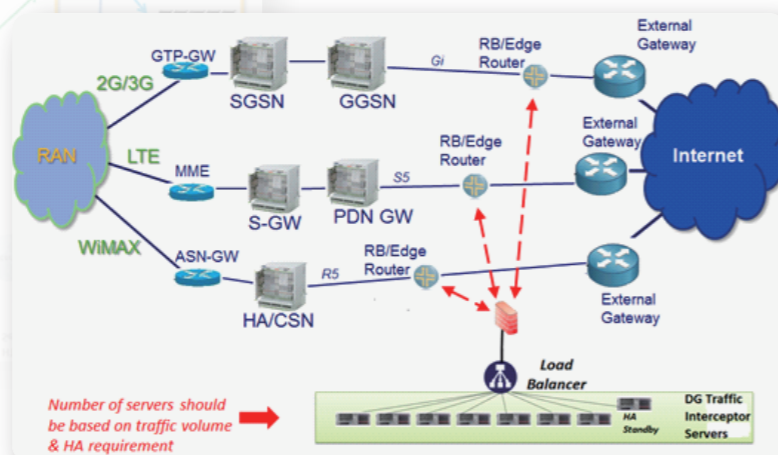

### For Fixed Network

Such as packet data network in POP Center of ISPs, IMS...etc.

### For Mobile Networks

Such as PDN part of 2G/3G, WiMAX and LTE...etc.

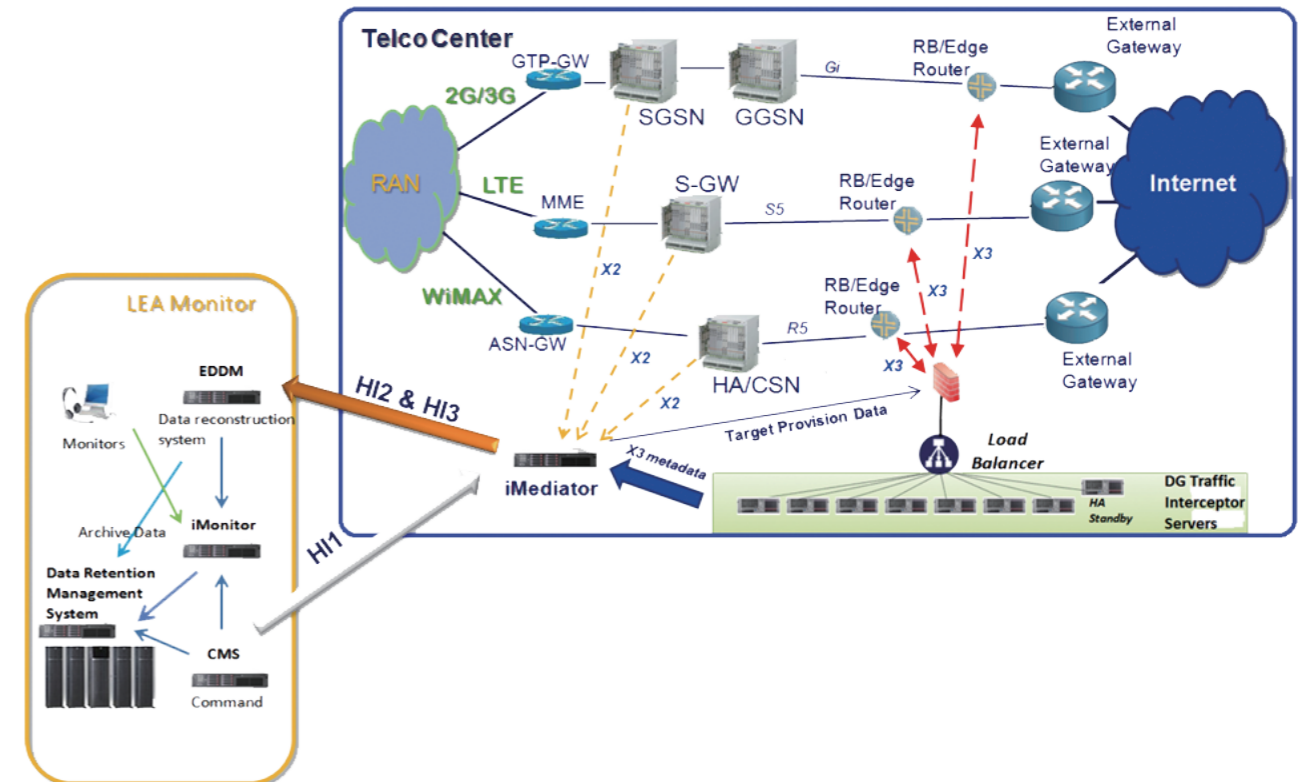

### For Internet Exchange Gateway

State Internet Exchange Gateway, marine and satellite stations...etc.

## Investment protection

In order to protect your investment, DG Tactic LI Package can be upgraded into regular ETSI-compliance LI platform, as example below, for your future demand.

## Target on Online Services

Interception on 140+ popular services on generic computing systems (PC and Laptop) and mobile platforms (Android and iOS) through browser and APPs, such as POP3, SMTP, IMAP, Gmail, Facebook, Twitter, WhatsApp, Line...etc. with provision data and content information for cybercrime monitoring and analysis.\*

\*detail support online service list may be changed due to offer change by original service providers. Please contact Decision Group for further updating information.
